# SISENSE

Power to the builders. Insights for everyone.

Empowering developers, data engineers, and business analysts to simplify complex data and transform it into powerful analytic apps.

Technology Innovation

Single Stack™

ETL | BI DB | Visualization | Analytics

Feature: Provides the full range of capabilities to prepare, analyze, visualize and govern any type and size of data, all in a single tool.

Results: Fast, simple implementation that is easy and cost effective to maintain.

In-Chip™

Distinct approach to query management, improves query processing speed by orders of magnitude.

Feature	Result
Columnar Data Store	Faster to scan/easier to compress
Vectorization and in-cache decompression	Breaks result sets into small pieces that can be decompressed and live in cache, minimizing the number of roundtrips between CPU/RAM
Recycling	Breaks queries into granular discrete instruction sets that can be stored and reused across queries and users.
Just-in-time (JIT) Compilation with SIMD support	Achieves speed of native compilation.

Power to the builders

Sisense is an API-first cloud technology that makes it easy to mashup data and create analytic apps — get ready to embed anywhere.

Insights for everyone

Drive change and build your business with a self-service analytics platform that leverages all of your data — no matter where it is.
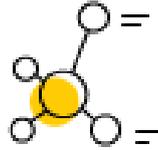

Obsessed with your success

Our customers rank us #1 in customer service and no other BI provider can match our focus and commitment — just ask our customers.

Everything you need to build powerful analytic apps

Embed

Embed analytics anywhere with full customizations and white labeling that are secure and scalable.

Mashup

Mash up a combination of live or cached data models to optimize performance and manage resource utilization.

Analyze

Analyze data from across your entire data landscape and transform it into powerful visualizations and actionable application components.

Impact

Impact business decisions and drive change with deep insights and answers to complicated questions.

Deploy

Deploy on the cloud, on-premises, or hybrid using Linux or Windows.

Control

Control access at system, object, data, and process levels, including recovery and audit trails.

Agile BI to build powerful analytic apps

The Sisense data and analytics platform is a complete end-to-end BI platform that empowers data engineers, developers, and analysts to build analytic apps that deliver highly interactive user experiences.

Insights for Everyone

Make decisions and challenge assumptions by equipping end-users with the insights they need, when and where they need them. Sisense helps everyone in your organization drive change and build the business using innovations in AI and ML that deliver BI with more impact than you ever thought possible.

Think Smart. Think Smartz.
